### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: the art of record (considered as a whole) neither anticipates nor renders obvious a method of polishing a substrate comprising a noble metal in oxidized form including the steps of contacting the substrate with a CMP system comprising a liquid carrier and ascorbic acid as a reducing agent in an amount of about 0.1 to about 1% by weight of the liquid carrier in combination with the rest of the claimed limitations set forth in the independent claim. The previous rejection was based on an obviousness rejection to replace any of the applicant's claimed reducing agents for the reducing agents disclosed in the prior art references because the applicant had not provided any evidence of criticality or unexpected results for the large group of reducing agents. In response to the amendments and arguments, the Examiner agrees that the applicant has provided sufficient evidence of criticality and unexpected results when using ascorbic acid as the reducing agent, specifically in Tables 1 and 2 in the specification. Therefore, the Examiner concedes that the claimed limitation of using ascorbic acid in a range of 0.1 to 1% by weight as a reducing agent does constitute patentable subject matter over the prior art.
2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bryan R. Muller whose telephone number is (571) 272-4489. The examiner can normally be reached on Monday thru Thursday and second Fridays.
